

The S.R.P.C. Executive Committee requests a vote of the membership at the January 17, 2020 annual banquet and business meeting on the following proposals.

1: The Executive Committee is asking for approval to use \$5000.00 from the General Treasury Fund to continue the work on improvement projects that was presented at the July 2019 semi-annual business meeting. The proposed projects will be to continue the improvement of the long range area, to raise berms on the cowboy range, and to further develop the L-berm area. These projects were to be addressed in multiple stages, to complete as much work as the approved funds (equal to 1 week of Dozer work) allowed per stage.

2: The Executive Committee is asking for approval for a discretionary account for Emergency Damage Repairs in the amount up to \$5000.00 from the General Treasury Fund. This would allow for the expenditure of funds during an emergency situation, which would normally require a vote of the membership after a 15 day notice, at one of the semi-annual business meetings, to expend the funds from the General Budget. The funds will remain in the General Treasury Fund until expenditures are needed.
